INTERNET PROOFREADING ASSIGNMENT #2

Name:	Date:	
Directions:	Read the following paragraphs. Identify the errors that exist and choose the appropriate proofreader mark that will correct the errors.	
ROCKS ANI	O MINERALS	
The E	Earth's crust floats on top of the mantle. The crust is, on the average, about 2	25
miles thick be	elow the continents and four-to-six miles thick below the oceans.It is made	up
•	kinds of rock. Basalt, a very dense rock, sinks down in the ma ntle and for sheeath the oceans. Granite, a lighter rock, floats higher on the mantle to	rm
form the cont	inents.	
Rocks are ma	nde up of minerals and form in three ways. igneous rocks develop when	
molten Mater	rial from deep within the earth cools and hardens. Granite is an an igneous	
rock. Metam	orphic rocks are formed when certain materials are exposed to great heat ar	nd
pressure, whi	ch changes their structure. Marble is a rock meta morphic which began as	
limestone. S	edimentary rocks are layers of plant, animal or mineral material that have be	een
pressed and c	emented together. An example of this is made from the remains of ancient	
limestone, se	a organisms	
Directions:	Draw the proofreading symbol on the line provided next to its name.	
1. Double Sp	oace 6. Let Stand	
2. Insert	7. Transpose	
3. Move as S	Shown 8. Underline	
4. Boldface	9. Lowercase	
5. Single Spa	ace 10. Delete
