North Dickinson Elementary

Grade 5 – Mrs. Rider

I can prove it you that North Dickinson is a great public school to go to. First of all, the students and staff here are amazing. Secondly, our special programs such as Vista, Life Skills, therapy, reading and speech that can benefit everyone. Finally, North Dickinson also has many astounding physical traits as well. This proves that North Dickinson is truly special and awesome public school.

I just moved to North Dickinson but I didn't need to be there long to know that the students and staff are awesome. First of all, I can tell you for a fact that it was very hard to move away from Mt. Holly. North Dickinson was definitely a great school to move to. Everyone welcomed me with kindness and respect, and even some humor. Second, even with everything that is going on this year, our students and staff are working very hard to pull through. Finally, the teachers are amazing. They try to make everything fun and are very kind and forgiving.

North Dickinson also has many amazing programs for students who need extra help in one way or another. These include Vista, Life Skills, therapy, reading and speech. First off, having extra support rooms can be very beneficial for the students in and all of the other students. These programs can also be very beneficial for the students in need later in life. Finally, it is better for those students because the teachers in the rooms with them can worry about their needs on individual level rather than the needs of the whole class.

Finally, North Dickinson also has many outstanding physical traits as well. First of all, the long hallways may seem confusing at first. I know they did for me coming from a one hallway school but this will help you get ready for middle school. Also, the large variety of playground equipment is very fun and awesome. There are many fun things to do when recess time comes around at North Dickinson. For example, there are a lot of balls and other hand-held equipment. Stationary equipment at North Dickinson includes a gaga ball pit, a basketball court, a soccer field, a kickball field, a four-spout plastic ball basket, a tetherball post, a volleyball net and a big fenced in grassy field. Trust me, it's awesome.

I think I made it pretty clear that North Dickinson is a special, great and awesome public school. So, come on down and stop by North Dickinson Elementary School where everyone is a buddy, not a bully. We will be happy to welcome you into our one big family. From students to staff, from Vista to Life Skills, North Dickinson Elementary School has it all.
